PATENT APPLICATION

5 entitled: SINGLE USE DEVICE FOR TRANSMITTING INFORMATION

in the name of:

10 assigned to: PROMEPLA

ABSTRACT OF THE DISCLOSURE

15 This invention relates to a single use device for transmitting information,
allowing either identification of a circulating product, or management of the
dispensing/aspiration of a product, by means of a product dispensing machine,
in a patient, characterized in that it integrates a transponder emitting said
information by radio-frequencies.

20 The device is advantageously either a medical tool or a tube connecting
said machine to a patient.
